Summary

QA tester with 1 year of experience across banking and mining, currently testing Bank Mandiri's internal human capital platform. Writes test plans and end-to-end test cases, runs SIT, UAT, and regression testing in Agile sprints, and reports bugs by priority in Jira. Previously built web apps with PHP and MySQL, which helps when tracing bugs from the front end to the database.

Education

Universitas Diponegoro **2025**

Bachelor of Computer Science (S. Kom.) (GPA: 3.60/4.00) *Semarang, Indonesia*

- Built and tested an online student attendance system as a thesis project, which moved the school's attendance records online and gave teachers clear and simple reports.
- Took part in Diponegoro Big Data School (DBDS) 2021, learning the basics of data analysis and big data.

Work Experience

PT Bank Mandiri (Persero) Tbk **Jul 2026 - Present**

Quality Assurance Tester (outsourced via PT Grestenan Ramadhani) *Jakarta, Indonesia*

- Tested the Organization and Benefit modules of the Integrated HC Suite Platform (IHSP), Bank Mandiri's internal platform for managing human capital across Indonesia.
- Wrote test plans and more than 700 end-to-end and functional test cases, then ran SIT and regression testing in sprints.
- Executed 60 test cases a day and reported more than 50 bugs in Jira with priority levels, using DevTools to investigate issues.
- Worked with developers, business analysts, and project managers to follow up on test results and fix bugs before release.

PT Altimeda Cipta Visitama **Oct 2025 - Apr 2026**

Quality Assurance Intern *Depok, Indonesia*

- Wrote test plans, scenarios, and test cases for ADENCO (ADex), a mining management web app with five modules (Daily Diaries, Labor Rostering, Equipment Rostering, Project Setup, and Procurement), and for the WCC (West Coast Civil) project in its early stage.
- Ran manual, API (Postman), regression, and UAT testing on web and mobile in Agile sprints, logging bugs by priority with the expected and actual result for each issue.
- Tested ADex Eleanor, an AI assistant built on MCP, with CRUD scenarios written as prompts to check accuracy and response speed.
- Monitored production and validated features in development, staging, and production before each release, using DevTools to trace issues.

SMA Negeri 9 Palembang **Oct 2023 - Apr 2024**

IT Support Intern *Palembang, Indonesia*

- Built an attendance web app with PHP (CodeIgniter) and MySQL.
- Tested and debugged features over 6 months of development, based on requirements from admins and teachers.

Semarang City's Data Archives & Library Department **Jan - Feb 2022**

IT Support Intern *Semarang, Indonesia*

- Ran functional tests on an online visitor registration system and checked that its dashboard data was accurate.

Universitas Diponegoro **Aug - Dec 2021**

Practicum Assistant *Semarang, Indonesia*

- Taught SQL queries, data normalization, and database schema design to more than 60 students in the Database lab course.
- Graded lab assignments, wrote assessment reports, and gave individual help based on the results.

Personal Projects

Manual Testing Portfolio: OrangeHRM and SauceDemo **Nov 2026**

Personal Project *OrangeHRM Results* *SauceDemo Results*

- Ran 73 test cases on two public demo apps, OrangeHRM (HR) and SauceDemo (e-commerce), using equivalence partitioning, boundary value, and state transition testing.
- Reported 23 bugs with severity, steps, and screenshots, such as an order that went through with an empty cart.
- Wrote a test plan, traceability matrix, and summary report for each app, and traced JavaScript errors with DevTools.

Skills

Testing: Test Plans, Test Scenarios & Test Cases, SIT, UAT, Regression Testing, End-to-End & Functional Testing, API Testing, Manual Testing (Web & Mobile), Bug Reporting & Prioritization, Agile Sprints
Tools: Jira, Postman, Browser DevTools, Katalon (personal projects), SQL & MySQL
Technical: PHP (CodeIgniter), HTML/CSS, Database Design
